SERVICE CONTRACT ACT

PSI acknowledges the requirements for SCA and verifies that all categories/services covered by the SCA meet or exceed the wage determination base rates and fringe benefits under the contract. Revision 3, dated 4/8/2016 of the SCA Wage Determination was used for this table. PSI acknowledges that it is required to comply with applicable SCA wage determinations and fringe benefits regardless of price proposed and awarded on any resultant Schedule contract. All price adjustments for the base period and all options will be in accordance with clause 52.222-43, Fair Labor Standards Act and Service Contract Act Price Adjustment.

(Washington DC)

SCA Eligible Contract Labor Category	WD Number	SCA Equivalent Code - Title
Data Entry Specialist	05-4281	01051 Data Entry Operator I
HSPD12-Enrollment Specialist/Fingerprint Technician	05-4281	30221 Latent Fingerprint Technician I
Program Support Specialist	05-4281	01020 Administrative Assistant

“The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.”

PROGRAM MANAGER

Duties. Program Managers are experts in the business areas for which they are responsible. In addition, they are experts in various business and organization management disciplines such as finance, marketing, operations, sales, and human resources management. Furthermore, Program Managers are educated and experienced with traditional and innovative strategic planning techniques to ensure that clients receive the most efficient and effective service possible. The Program Manager plays a critical role in client interaction and team leadership.

Qualifications and Education. Bachelor's Degree plus 10 years' experience (or equivalent). Must be able to obtain and maintain a Secret or Top Secret clearance if required.

PROJECT MANAGER

Duties. The Project Manager coordinates site project work flows, quality assessments, organizational assessments, and performance assessments. The Project Manager is a uniquely talented and experienced individual with knowledge of background screening

Corporate Profile

Protection Strategies Incorporated (PSI) is a national security and service provider located in Oak Ridge, Tennessee. **PSI** is a recipient of the **738X Federal Supply Schedule Contract #GS-02F-0067T**. **PSI** holds a facility clearance, **Cage Code 1JF37**. **PSI** currently provides Pre-Employment Screening, Risk Management, National Security Consulting, Personnel Security Support, and Security and Administrative Support Services to various Federal, State and local government agencies, and to several large corporations worldwide.

PSI is a highly respected security management and support services contractor. **PSI's** founders have been successfully supporting national security programs for a combined total of over 100 years. On every project, **PSI** management ensures outstanding results through a constant evaluation process that helps to maximize productivity while minimizing errors and costs. Collaborating with a client, **PSI** applies robust management and business process analysis techniques to help identify a client's needs. **PSI** then crafts a comprehensive solution unique to each client's needs to ensure mission accomplishment in timely and cost-effective manner.

Protection Strategies Incorporated
118 Mitchell Road, Suite B
Oak Ridge, TN 37830
Tel: 865.294.5101
Fax: 865.481.4888

Our Mission

PSI is committed to becoming the leading provider of national and international security needs with our unprecedented commitment to delivering the **Highest Standards of Quality Services** by adhering to the following principles:

- **PSI** offers exceptional support services at low competitive rates on a wide range of security disciplines; resulting in some of the industry's most competitive rates and comprehensive programs.
- **PSI** retains the security industry's most respected subject matter experts through an established working environment that nurtures creativity and innovation among its employees; encourages promotion from within; and offers comprehensive, competitive benefits, resulting in an outstanding rate of employee retention.
- **PSI** carefully ensures the recruitment of a highly qualified diverse staff, to include women and minorities; requires all technical staff to maintain a top level federal security clearance (relative to specific contract requirements); and provides seasoned professionals in all security disciplines to our customers.

Protection Strategies Incorporated
118 Mitchell Road, Suite B
Oak Ridge, TN 37830
Tel: 865.294.5101
Fax: 865.481.4888

Competitive Advantage

PSI employs a staff of highly skilled, seasoned security experts. Each professional staff member possesses an impressive background in safeguards and security, background investigations, protective force services, project management, and security operations management. **PSI's** core corporate staff have over 100 years of combined national level security services experience performing personnel security background investigations and adjudications; chemical/biological countermeasures, weapons of mass destruction, and emergency/contingency planning; analyzing risks, assessing areas of vulnerability, and advising necessary actions to both government and commercial clients.

PSI's operations personnel are experienced professionals at providing accurate information quickly, maintaining privacy, security and confidentiality at all times. **PSI** staff has extensive experience and is highly regarded in the area of assessing and ensuring compliance expertise with local, State and Federal regulations. Our corps of security experts are veterans with years of experience with the Department of Defense, Department of State, and the Department of Energy. All **PSI** technical personnel hold a DOE 'Q' security clearance and/or a DOD "Top Secret" security clearance. Our subject matter experts have conducted airport, seaport, and rail station assessments, other critical transportation node vulnerability assessments, and validation of readiness through "credible adversary" performance testing, both nationally and abroad. **PSI's "adversary perspective"** is unique and complements the traditional protection program methodologies. Historically, security planners identify what constitutes their "core assets" and then design its security in layers outward from those assets. **PSI's** Credible Adversary Specialists identify targets that are the most attractive to a variety of diverse adversary sets, establish potential adversary paths and penetration techniques likeliest to be used, and outline security measures and actions that will reduce or eliminate the risk of adversary success to acceptable limits.

Protection Strategies Incorporated
118 Mitchell Road, Suite B
Oak Ridge, TN 37830
Tel: 865.294.5101
Fax: 865.481.4888

This "outside the box" approach is not designed to replace traditional security planning, but provides an additional tool that can be utilized to increase the success of the overall protection program planning effort.

PSI has successfully applied this technique in overseas security risk assessments for government and commercial industries, airport and nuclear facility vulnerability assessments, security systems requirements assessments, "live" adversary penetration-of-systems performance tests, and in "tabletop" scenarios.

PSI specializes in providing integrated, multi-disciplinary security services to Government and commercial clients. **PSI** has participated in the development and validation of Continuity of Operations Plans (COOP) for various government agencies. **PSI** is widely recognized for comprehensive protection programs that integrate physical, technical, information, operations, personnel, computer, and communications security disciplines. In planning, implementing, or evaluating protection programs, **PSI** uses threat and vulnerability modeling methodologies, cost-benefit analysis, and other risk management tools to optimize cost effectiveness. **PSI** has extensive experience in developing threat models for physical and cyber terrorist threats, terrorists using weapons of mass destruction, technical attacks, and operations security (OPSEC) vulnerability assessments. **PSI** personnel have developed, assisted in and assessed large scale, multi-agency emergency management exercises. These exercises have included scenarios involving weapons of mass destruction in forms ranging from improvised explosive radiological devices to full scale nuclear attacks.

PSI also provides technical security services as a part of an integrated information assurance program. This includes identification and characterization of methods of compromising infrastructure system components and identifying successful attacks. As part of this activity, **PSI** is responsible for identifying vulnerabilities and attack signatures.

Protection Strategies Incorporated
118 Mitchell Road, Suite B
Oak Ridge, TN 37830
Tel: 865.294.5101
Fax: 865.481.4888

PSI's proven expertise in all areas of security, safety and other related fields provides clients a convenient, comprehensive approach to addressing all their security service's needs.

Specialized Experience

Pre-Employment Screening - Background and Suitability Checks

PSI performs pre-employment screening, conducting background and suitability checks to ensure that candidates for employment in Federal buildings do not have connections to groups detrimental to the security of the United States, or individual characteristics or backgrounds that would pose a risk to the Federal Government or other employees. The applicant's background is reviewed in accordance with applicable local, state and Federal laws using numerous public, law enforcement and other government databases. Reviews include verification of previous employers; salary histories; criminal records checks; education verification; reference checks; professional license verification; residence verification; family and neighbor verification; and credit history checks. All investigative activities are conducted in compliance with the Fair Credit Report Act.

The results of investigations are compared to the standards contained in Title 46 of the Code of Federal Regulations, Subchapter B, and/or OPM guidance, and a recommendation is made to the Government as to whether or not employment or access should be granted. If derogatory or potentially disqualifying information is uncovered, that information is completely investigated prior to making a recommendation to the Government.

Vulnerability Assessments

In response to the terrorist attacks of September 11th, 2001, the Center for Chemical Process Safety (CCPS) determined that there was an urgent need for the chemical industry to review its infrastructure and identify and mitigate potential vulnerabilities. **PSI**

Protection Strategies Incorporated
118 Mitchell Road, Suite B
Oak Ridge, TN 37830
Tel: 865.294.5101
Fax: 865.481.4888

assisted the CCPS in developing a uniform, effective, and common vulnerability assessment methodology. **PSI** was selected because of our extensive background in national level vulnerability assessment methodologies and risk management programs dealing with terrorism, terrorist capabilities, and weapons of mass destruction. As a result, the CCPS developed a new guidelines book (co-authored by **PSI** staff), titled: Guidelines for Managing and Analyzing the Security Vulnerabilities of Fixed Chemical Sites.

PSI personnel are certified to conduct Vulnerability and Risk Assessments for designated critical infrastructure facilities. **PSI**'s security professionals are certified in the Community Vulnerability Assessment Methodology (CVAMSM) developed by Sandia National Laboratory. **PSI** staff uses CVAM as a systematic process to assist communities in assessing threat, prioritizing targets, identifying consequences, assessing completeness and effectiveness of security systems, and to provide decision makers with the information necessary to make informed decisions on effective use of resources to address vulnerabilities and mitigate risks.

Key components of an assessment include:

- Identifying threats and critical facilities;
- Determining how facilities are vulnerable to identified threats;
- Providing mitigation strategies, security system designs, and security enhancement planning;
- Community Vulnerability Assessment Methodology (CVAMSM) Risk Assessment Methodology - Water (RAM-W);
- Risk Assessment Methodology - Dams (RAM-D) Risk Assessment Methodology - Transit (RAM-T).

In summary, our collective corporate experience coupled with our past performance

Protection Strategies Incorporated
